

PICKETT EQUIPMENT

Because YOUR STAND IS EVERYTHING ... We introduce the ...
SUGAR BEET MANAGER

- * Proven Performance For Increased Yields
- * Operating in Various Beet Producing Areas

*Manufacturers of
the Most Innovative
Farm Equipment*

- * Durable Quick Set, Adjustable Row Modules with Dual Gauge Wheel Depth Control. Each row can be independently set to thin, aerate, block & weed in the row.
- * Wider window of opportunity to operate the machine. When your stand is established, 6 to 8 leaf stage or slightly bigger, the timing is ideal to start.
- * Reduces Labor Costs along with Labor Hassles.

IF YOU ARE A SUGAR BEET GROWER, IT WILL BE WORTH YOUR TIME TO LOOK INTO THIS MONEY SAVING TOOL.

SUGAR BEET MANAGER

PICKETT EQUIPMENT

Manufacturers of
the Most Innovative
Farm Equipment

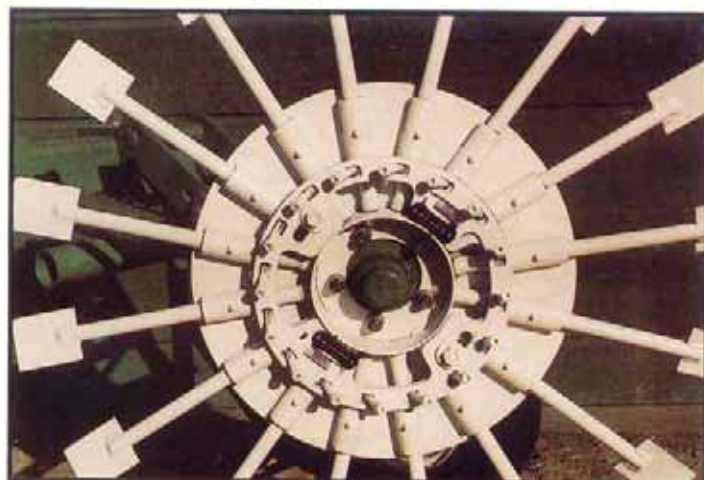

The sweeping motion moves dirt between the beet plants, providing aeration, weeding, cultivation, and blocking if desired.

Depth of the sweep blade (1 to 3") can be easily adjusted and maintained with heavy duty gauge wheels (1 gauge wheel per 2 modules). The size of the sugar beet will determine the sweep depth.

Additional adjustments provide the angle of sweeping motion that determines the width of sweep desired, held with set screw and bolt for secure positioning.

This quick-set module is easily adjustable. Depending on plant population, it will adjust to reduce stand from 0 - 40%. A plant population calculating card is provided for optimum settings.

Model	Description
4030	4 Row 30"
6022	6 Row 22"
6030	6 Row 30"
8030	8 Row 30"
8030F	8 Row 30" Folding
1230F	12 Row 30" Folding
1222	12 Row 22"
1824F	18 Row 24" Folding
2422F	24 Row 22" Folding
2422FL	24 Row 22" Folding/Lateral Float Wings
